CC:  
Governor O'Malley and BPW Exec. Secretary McDonald

Ms. Bose,

I'd like to express my support for the approval of Dominion's LNG facility. Their operation will create 75 permanent full-time jobs, along with thousands of new local construction jobs, yielding in an additional \$23 million in local tax revenue. These kinds of benefits are glaring and truly needed right now. The truth is, we cannot continue to sit on the benefits that this project will create, all the while complaining about the economy, when we have the answer right in front of us.

Your Environmental Assessment was clear: the project will create no significant impact to the environment. When the positives so outweigh any risks, the only sensible thing to do is to approve this project so we can get it up and running as soon as possible.

Thank you for all of the work you have done on this important matter.

Best,

  
Sydney Barr
